If you are applying from outside the EU and you need a visa, we strongly recommend you to make an appointment with the embassy as soon as you receive the letter of acceptance. It often takes weeks before you get an appointment, and even more time until you have completed the visa process. We expect all students to be present in the first week of classes, so receiving your visa in time is absolutely essential.

Please, be informed that the winter term 2020-2021 starts on 12.10.2020.

The preparatory courses for the students in the Master in Cognitive Science begin on 28.09.2020 (10 sessions till 09.10.2020) and are mandatory for all the program participants (an additional reminder with details and deadline will follow).

For purposes of your admission to the Master in Cognitive Science, you need to take an interview (per Skype or, in some cases, in-person) with the program supervisors. You will receive an invitation with an assigned time slot according to the schedule. An overview of the time slots for Skype interviews will be later uploaded on our website.
